

PALAMAKULA DEEPIKA

Data Analyst | ML Engineer

☎ [+917842248277](tel:+917842248277) ✉ deepikaravikumar26@gmail.com 🐙 [github/deepika](https://github.com/deepika) 📍 Tirupati

CAREER OBJECTIVE

I am eager to join an organization that will allow me to apply my current knowledge while gaining new skills relevant to the industry. My goal is to contribute to the organization's success while pursuing both personal and professional growth. I aim to bring a proactive and adaptable approach to addressing complex challenges in dynamic environments

EDUCATION

Saveetha Engineering College | 2021-2025

Bachelor of Technology in Artificial Intelligence and Machine Learning

Sri Chaithanya Junior College| 2019-2021

Board of Intermediate Education - MPC

WORK EXPERIENCE

FabHost Complete Web Sol.

Jan 2023 - Mar 2023

ML Intern

Worked on supervised learning models using Python to solve predictive modeling problems.

- Performed data preprocessing, feature engineering, and model evaluation for ML tasks.
- Collaborated with a team to optimize workflows, improving model accuracy by 10%.
- Developed scripts for automation of data cleaning and pipeline integration.

PROJECTS

TOXIC GAS LEAK DETECTION AND ALERTING DEVICE

Oct 2022 - Jan 2023

- Developed an IoT device that alerts people and organizations if any harmful gases related accident by sending SMS and emails with a sound alert System.
- We can monitor the live atmospheric levels and we use an RFR Machine Learning Algorithm to analyse how critical or poisonous the gas lead is.
- Utilized tools such as ESP32, DHT11, MQ135, Blynk, Pycharm, Aurdino IDE, RFR Algorithm, NFTTT automation tool.

Financial Performance & Budget Analysis Dashboard

Mar 2023 - Apr 2023

- Created a dynamic Power BI dashboard to analyze a company's financial performance by tracking revenue, expenses, and profitability against budget targets.
- Sourced a mock corporate financial dataset that included tables for income statements, balance sheets, and operational budgets. Utilized Power Query for advanced data modeling, including unpivoting data to a clean, transactional format and creating a date table for time-intelligence analysis.
- Delivered a data-driven dashboard that enabled business leaders to quickly identify over-budget departments, pinpoint the sources of revenue growth and improve profitability.

Driver Drowsiness detection system

June 2023 – Sep 2023

- Engineered a Python-based driver drowsiness detection system, leveraging specialized libraries for continuous monitoring of the driver's eyes.
- Implemented a robust Convolutional Neural Network (CNN) to precisely classify images of eyes, with a classification accuracy of 95%.
- Utilized the powerful OpenCV library to capture images through the webcam, ensuring seamless integration and achieving an image capture rate of 30 frames per second.

STRENGTHS

- Leveraged ML and data analysis to solve business challenges and drive predictive insights.
- Designed and deployed scalable solutions, like a real-time IoT alerting system, by translating business needs into technical requirements.
- Innovatively integrated technologies, including IoT and Power BI, to create valuable solutions and improve operational efficiency.
- Collaborated on workflow optimization, resulting in a 10% improvement in model accuracy.

SKILLS

- | | | |
|--------------------|----------------------|--------------|
| • Machine Learning | • C, Python, SQL | • UI/UX |
| • Data Analysis | • Data Visualization | • Automation |

CERTIFICATIONS & ACHIEVEMENTS

- | | |
|---|--------------------------------|
| • Java Full Stack Certification | - WIPRO |
| • Power BI Certified | - Skill Nation |
| • Google Cloud Skills Boost | - Google |
| • Event Organizer in Celenza 2023 at Saveetha Engineering College | |
| • Active participation and runner up in MSME Hackathon | |

HOBBIES

- Listening to Music
- Dance
- Volunteering in Tech Events
- Cooking
